Viral Hepatitis in India

Published On: June 20, 2020 | Pages: 003 - 006

Author(s): Suresh Kishanrao*

Viral hepatitis is a cause for major health care burden in India and is recently equated as a threat comparable to the “big three” communicable diseases – HIV/AIDS, Malaria, and Tuberculosis. Hepatitis A virus and Hepatitis E virus are predominantly enterically transmitted pathogens and are responsible to cause both sporadic infections and epidemics of acute viral hep ...
