Robot-assisted First Fib Resection for Neurogenic Thoracic Outlet Syndrome

Published On: March 21, 2019 | Pages: 001 - 005

Author(s): Vancoillie Peter Jan, Wybaillie Elke, Maene Lieven and Beelen Roel*

Background: When conservative measures fail in the treatment of thoracic outlet syndrome (TOS), a first rib resection (FRR) is in order. Nowadays, a transaxillary or supraclavicular approach is most commonly used. However, both techniques have technical limitations. Objective: In this paper a minimal invasive, robot-assisted thoracoscopic technique tackling those sho ...
