Biogenesis of *Melia Azedarach* silver nanoparticles using leaves and fruits in breast and ovarian cancer cell lines

Published On: May 02, 2023 | Pages: 008 - 016

Author(s): Kousalya Lavudi, Rekha Rani Kokkanti, Srinivas Patnaik and Josthna Penchalaneni*

Folk medicine has been considered one of the novel remedies for treating cancers. Women's cancers are increasing worldwide, and disease recurrence has been a major threat all over the world. Our current study focused on the formation of silver nanoparticles (AgNPs) by organic methods and their chemo-preventive capacity against the breast (MCF-7) and ovarian cancer (PA ...

Robotic assisted laparoscopic radical prostatectomy with the new surgical robot Hugo™ RAS in a man with proctocolectomy and restorative ileal pouch-anal anastomosis. The first European urological step-by-step procedure

Published On: March 24, 2023 | Pages: 004 - 007

Author(s): Totaro A, Scarciglia E*, Ragonese M, Creti A, Bizzarri FP, Campetella M, Gandi C, Palermo G, Racioppi M and Sacco E

Robotic-Assisted Laparoscopic Radical Prostatectomy (RARP) is the gold standard surgical treatment for localized clinically significant prostate cancer. In patients undergone previous abdominal or pelvic surgery, it can be difficult to perform and it is also contraindicated execution of radiotherapy. We have described step-by-step the first case of RARP performed wit ...

A Band from the “Blue”

Published On: March 21, 2023 | Pages: 001 - 003

Author(s): Padmanabha Vijayan*

Several lesions of the bladder are incidental findings and a few of them are seen against a background of bladder outlet obstruction. Tuberculosis of the bladder is associated with characteristic lesions and changes. Presented here is a never-seen-before bladder lesion in a patient presenting with symptoms of Bladder Outlet Obstruction due to an enlarged tuberculous p ...
