Giant Vesical Calculus with Vesico-Vaginal Fistula and Multiple Sewing Needles in the Peritoneal Cavity in a 13 year old Female

Published On: January 18, 2025 | Pages: 001 - 003

Author(s): Padmanabha Vijayan*

A 13 year old post pubertal nomadic girl came to us with a history of recurrent lower abdominal pain and urinary incontinence of 3 years duration. She also had intermittent hematuria. She also stated that her late (mentally deranged) mother had inserted multiple needles into her (patient's) vagina when she was 5 years of age. She underwent a successful 2 stage surgica ...
