The association with histopathological findings and predictive significance of transforming growth factor beta 1 (TGF 1) in patients with chronic viral hepatitis

Published On: July 11, 2023 | Pages: 005 - 010

Author(s): Mehmet Sait Bugdaci*, Cetin Karaca, Ali Rza Koksall, Salih Boga, Canan Alkim and Mehmet Sokmen

Background: Chronic Viral Hepatitis (CVH) is the most common cause of hepatocellular cancer and cirrhosis related to liver fibrosis. The gold standard in the diagnosis of fibrosis is liver biopsy. TGF 1 is a pleiotropic cytokine that plays a pivotal role in carcinogenesis and fibrosis. The results of studies investigating the relationship between TGF 1 and histopath ...

Viral hepatitis B in patients with hematological malignancies (Overview)

Published On: January 30, 2023 | Pages: 001 - 004

Author(s): SV Sidorkevich*, VN Chebotkevich, AV Kuleshova, EI Kajtandzhan and SS Bessmeltsev

The review presents current data on the role of viral hepatitis B in oncohematological patients. Possible ways of infection, prevention of infection, and activation of hepatitis B in this category of patients are considered. The specific features of the course of hepatitis B in various clinical situations are described: against the background of other viral infections ...
