## **A case of high drain output after renal transplantation: Review of current evidence**

Published On: December 20, 2018 | Pages: 001 - 005

Author(s): Sajid Mohmad, Ajay Sharma and Ahmed Halawa\*

Surgical complications are not uncommon after renal transplantation. They should always be in the differential diagnosis of renal graft dysfunction. While ruling out or confirming a surgical cause of graft dysfunction, a sequential approach should be undertaken starting from clinical examination and moving on to more invasive investigations as the clinical picture bec ...
