Pediatric Ear and Nose Foreign Bodies during COVID-19 Pandemic: Is it so boring to Stay at Home?

Published On: August 08, 2024 | Pages: 019 - 023

Author(s): Sabrina Garofolo*, Ivana Fiz, Andrea Melagrana, Roberto D'Agostino and Lucia Semino

Introduction: During the COVID-19 lockdown children, confined at home, had a potentially increased risk of domestic accidents like the placement of foreign bodies in ears and noses. Thus, we analyzed the impact of the COVID-19 outbreak on Ear, Nose, and Throat (ENT) consultations in the ED of Giannina Gaslini Children's Hospital in Genoa due to foreign bodies (FB). M ...

Errors in the Assumptions of Bekesy's Traveling Wave Theory

Published On: July 20, 2024 | Pages: 016 - 018

Author(s): Jan Myjkowski*

This article examines the fundamental statements of Bekesy's traveling wave theory in hearing and proposes an updated perspective on auditory information processing mechanisms. It argues that the traditional theory does not adequately account for non-mammalian auditory mechanisms, as many species effectively perceive sound without a basilar membrane or cochlear fluids ...
