## External Esophagotomy for Removal of a Vulnerable Foreign Body from the Esophagus: Case Report

Published On: February 12, 2026 | Pages: 001 - 004

Author(s): B Loum\*, kMA Diouf, F Niang, TB Diallo, CB Ndiaye, A Touré, MR Ndiaye, CL Diagne, A Ndiaye and CA Lame

Introduction: Endoscopic removal of a dangerous foreign body can pose a risk of complications such as perforation of the digestive tract. In this case, cervicotomy is a highly effective alternative. In this topic, the authors describe the extraction by esophagotomy of a denture with four teeth and two metal clasps performed in the ENT department of Hopital Principal d ...
