## Sleep parameters during polysomnography and continuous positive airway pressure titration in severe obstructive sleep apnea adult patients

Published On: July 26, 2021 | Pages: 019 - 022

Author(s): Utku Kubilay\*

**Objectives:** The aim of the present study was to demonstrate the effect of continuous positive airway pressure treatment on sleep parameters in severe obstructive sleep apnea patients. **Patients/methods:** Data regarding apnea-hypopnea index, total sleep time, sleep efficiency, rapid-eye-movement (REM) density, REM latency, total REM episodes during polysomnography and c ...

## Endobronchial laryngeal tumor “embolus”creating respiratory difficulty during surgery: A case report

Published On: July 31, 2021 | Pages: 023 - 023

Author(s): Ray Dieter\*

Unusual laryngeal and tracheobronchial obstructing lesions are seen on occasion [1-3]. A patient was evaluated by his primary physician and pulmonologist due to symptoms referable to his chest including a cough and shortness of breath. Evaluation, including lexible bronchoscopy, revealed a primary carcinoma of the left upper lobe of the lung. ...
