Prenatal Alcohol Exposure Alters Osteoblast Gene Expression in Newborn Rats – Screening Study

Published On: April 10, 2026 | Pages: 001 - 015

Author(s): Isabel Chaves Silva Carvalho*, Noala Vicensoto Moreira Milhan, Luciane Portas Capelo, Patrícia Pimentel de Barros, Tamires Pereira Dutra, Antonio Olavo Cardoso Jorge, Cristina Pacheco-Soares and Rosilene Fernandes da Rocha

This study examined the impact of prenatal alcohol exposure on osteoblast gene expression in newborn rats. Sixteen Wistar rats were divided into three groups based on their diet: Alcohol, Pair-fed, and Control. Each group received the specific diet for eight weeks before breeding and during the three weeks of gestation. The newborns were euthanized on the fifth day of ...
