Challenges Faced by Pediatric Dentists in the Dental Management of Children with Autism Spectrum Disorder: A Review Article

Published On: March 14, 2026 | Pages: 001 - 006

Author(s): Ambarkova Vesna*, Zuhail Rushiti Gashi and Esran Ramadani Abdullahu

Autism Spectrum Disorder (ASD) is a neurodevelopmental condition characterized by deficits in social communication and interaction, as well as restricted and repetitive patterns of behavior. According to the World Health Organization, the global prevalence of autism has increased in recent years. These characteristics significantly affect the provision of dental care, ...

Enhancing Marginal Integrity and Interproximal Papilla Stability in Posterior Teeth Using Deep Margin Elevation with Ceramic Inlays/Onlays: A Clinical Report

Published On: April 23, 2026 | Pages: 007 - 012

Author(s): Nissaf Daouahi*, Yosra Gassara, Rim Kallala, Sarra Nasri and Zohra Nouria

Background: Defective posterior restorations with inadequate proximal morphology are commonly associated with plaque accumulation and localised periodontal inflammation. Restorative strategies that re-establish both marginal integrity and interproximal architecture are essential for maintaining periodontal health. Adhesively bonded ceramic inlays/onlays, associated wi ...
